

# SCADAPack 314E

## Smart RTU

Built on a native DNP3 architecture, the SCADAPack 314E features high-performance 32-bit processing, serial and USB communications, integrated power supply, advanced power-management, and a wide range of digital and analog I/O in a cost-effective, compact Smart RTU. The level 4 compliant DNP3 protocol comes with optional Secure Authentication and/or AGA-12 Encryption to improve message security for critical operations, and support for the open protocols of Modbus and IEC60870-5 is also offered. The SCADAPack 314E can be programmed locally or remotely using the IEC61131-3 programming language and is optionally configurable directly from ClearSCADA host software.

IEC60870-5 protocol is KEMA-certified for both IEC60870-5-101 and IEC60870-5-104.

This Smart RTU has the same I/O offering as the SCADAPack 334E but without an Ethernet port and one less serial port. It also offers the same small footprint, enabling compact mounting enclosures for applications where space is at a premium.
